Local delivery and set-up available for additional charge.

Free Delivery and set-up for local Tampa area Law Enforcement K-9 Officers.

Please call for pricing and availability.

Kennels provide portable protection for your pets

Animals are inquisitive and sometimes impulsive. Protecting them from the many temptations and perils that exist in the average yard can be challenging. With modular panels you can create virtually any size or shape kennel enclosure by simply adding or subtracting panels. Transform a simple kennel enclosure into a dog run by adding a few extra panels.

Safety Features

Gate panels are designed with special hinges that provide a safe clearance of just one inch between gate and panel frame. Kennels come complete with Master-Halco's patented Safe-T Flip Latch, which can easily be opened from either side, and is virtually impossible for animals to nudge open.

Easily expandable. Customize your own kennel or dog run.

Lightweight economy kennels keep pets safe

An optional shade screen is available to protect your dog from the sun.

Low cost kennels provide the safety and security your pets deserve. Lightweight, machine formed panels are designed for small to medium, passive animals.

K-9 Carriers take the risk out of transporting valuable hunting or show dogs in the back of your pick-up. They assemble in just minutes and come in models that fit standard and compact truck beds. You'll enjoy peace of mind, knowing your animal is safe and secure.

Commercial kennels provide extra security

Commercial-grade fence panels are especially suited to professional kennel operators and commercial breeder applications where facilities must house a wide variety of sizes and breeds.

Made with heavy weight chain link fabric and galvanized steel framework with square welded corners. Commercial panels feature two-inch extension legs which raise the enclosure to make cleaning with a hose convenient.

Maintenance free, durable and strong.
